INTRODUCTION TO

BITRIXTRADEFX COMPANY

About Bitrixtradefx

We are the future of Bitcoin Trading

We provide each investor working in finance and crypto currency field with the opportunity to get stable profit due to passing investments through wide range of Bitcoin Investment.Our trained experts monitor online each Bitcoin Trading and exchange daily and due to favorable exchange rate we maximize our investors' profit.One of the most exciting trends in investing today is the Bitcoin trend.As purveyors of financial news know, cryptocurrency trading can be highly profitable but it is also risky not tomention very intimidating because of its high degree of technical dependency.In order to be a successful cryptocurrency trader, one must have the requisite knowledge combined with savvy financial and regulatory insights, not to mention investment experience.That is where coinglobal comes in.We require that all of our traders empirically demonstrate a proven track record of being able to deliver stable returns for our

clients in the long run.

With a team of specialists who have decades in experience and whose analytical and theoretical skills

are unmatched, we can help you navigate the murky waters of cryptocurrency trading to your benefit.We areregistered!!! We have

WHAT IS MINING?

Mining is is a process in which transactions for various forms of cryptocurrency are verified and added to the blockchain digital ledger.To understand Bitcoinmining, you must understand the inner workings of this Cryptocurrency. The bitcoin is not tied to any country or economy. Instead, it's 100 percent decentralized and powered by math using complex algorithms that run on powerful computers. A key element to the Success of Bitcoin technology is ensuring its accuracy and the methodical release of additional currency over time. Mining accomplishes both tasks as miners discover and obtain bitcoins by completing specific tasks done in the company. An application-specific integrated

circuit(ASIC) is a microchip, designed and manufactured for a very specific purpose of producing hash. ASICs designed for Bitrixtradefx Investment. For the amount of power they consume, they are vastly faster than all previous technologies and already has made GPU mining financially unwise in some countries and setups. The company uses a BITMAIN ANTIMINER S9which ituses a mere 0.1 Joulesper Gigahash, making it roughly 2.5times more efficient than the Ant miner S7. The total power

consumption of the device works out to

around 1350 watts, although this figure is subject to about 7% of variance. The S9 consumes about 300W more than the S7.We also make use of a

Submerged Spiral Classifier, to prevent overheating of investors Mining Machine which can result to a wear or tiredness of the profit making processors. This Submerged spissral classifier are used to complete the work of the cooling lubricant. A GPU of AMD Radeon VII would be fixed in each investors account system this GPU have the properties of (Core Clock: 1,400MHz | Memory: 16GB HBM2 |Memory Clock: 4Gbps | Power Connectors:

2 x 8-pin |Power Draw: 300W | Outputs:3 x Display
